

Vision, Actions, and Language in the Brain

**Mondays and Wednesdays
February 16th-March 2nd
2:00pm
Community Center**

Dr. Mahon will present the new science of the mind: human brain mapping in health and disease. This series will provide an overview of the latest techniques that are used by scientists and clinicians to map functions in the human brain.

Topics By Lecture:

Monday, February 16th at 2:00pm

Introduction and overview to the new science of human brain mapping

Wednesday, February 18th at 2:00pm

Functional specialization and neural plasticity - two sides of the same coin?

Monday, February 23rd at 3:15pm

The seeing brain: what we can learn about how the brain supports normal vision by studying vision loss

Wednesday, February 25th at 2:00pm

Language and memory in the brain

Monday, March 2nd at 2:00pm

The future of brain science at the University of Rochester: translating basic science to the clinic

About the Instructor: Brad Mahon is a graduate from Harvard University, receiving his Masters in Cognitive Neuroscience in 2002 and Doctorate in 2009. He is presently an Assistant Professor in the Department of Brain & Cognitive Sciences, Neurosurgery Department, Center for Visual Science and Center for Language Science at The University of Rochester. Brad teaches undergraduate and graduate students on Cognitive Neuroscience, Plasticity, and Cognition.
